

Prediction and Project 1 Kickoff

AS USUAL, please find your name on the list of today's studio groups, find your partner(s), seat yourselves comfortably, and read through the rest of this document.

Today's Agenda

Today we'll work through the Chapter 8 notebook and (drumroll, please!) talk about Project 1 ...

Chapter 8 Notebook

Before you complete the main exercise of the notebook, draw a picture here of what you expect to find:

What is the difference between projection and prediction?

Project 1 Concept Sketch Activity

Work through the activity on a separate handout. Make any additional notes here if you need space as you work.

Reflection Questions

1. What is the difference between a result and an interpretation?
What is the relationship between the two? What's the problem with presenting results without interpretation?

2. Revise your Project 1 goals. Try to write 2–4 goals for your own learning during this project experience; try to write at least one for modeling and one for teaming. If you want to refer to your preliminary goals, they're in Worksheet 7 from September 14.

Next Steps

Before class on Thursday, please do the following things:

- ☐ Write your name here: _____
- ☐ Write your name(s) of your studio partner(s) here: _____
- ☐ Before you leave class today, be sure you've turned in your completed partner preference worksheet to your NINJA or instructor.
- ☐ By tonight: Scan this worksheet and submit it on Canvas.
- ☐ By Wednesday night: Read Chapter 9 and complete the Chapter 9 reading quiz on Canvas.
- ☐ By Sunday night: Complete and submit your Chapter 8 notebook via GitHub / Canvas.
- ☐ Meet in the studios on Thursday.
